Core elements of regional development in Tyrol

Decision-making responsibility at local level

One region – one strategy – one structure ("ONE STOP SHOP")

- local platform
- use of synergies through cooperation and coordination
- avoidance of duplication

Consistency of the **"strategy hierarchy"** (EU – federal – region – local level)

Increasing acceptance at local and regional level

⇒ visibility of the benefit is relevant

More effective through close cooperation between the regional and the local level

⇒ implementation orientation / cooperation / networking / funding

Implementation partnership between the region of Tyrol and the local level (cooperation on common strategic topics)

⇒ strengthening the strategic importance of the local level

⇒ current Topics: Revitalization of villages, Volunteer Partnership, Renewable Energy, Adaption towards Climate Change, Innovation (STEM), Circular Economy, Tourism and Mobility

⇒ Other Considerations for 2028+: Cooperation between municipalities, Culture
